

EXBERRY® Coloring Foods

Clean-label colors for milk and yogurt

GROWING COLORS

EXBERRY®

Deliver dazzling dairy with zero drawbacks

In the modern dairy market, the most important consumer demands include taste, health, sustainability, naturalness, and traceability.¹

When developing milk drinks and yogurts, color is every bit as vital. The right shade not only delivers visual appeal but can also influence expectations and experience of the flavor.²

EXBERRY® Coloring Foods are a clean-label coloring solution that can help manufacturers tick every box. They are made from non-GMO fruit, vegetables, and plants using traditional physical processing methods such as chopping and boiling.

As well as supporting cleaner and clearer label declarations, they can be used to deliver spectacular shades in milk drinks, yogurts, and plant-based alternatives.

Features

- Strong visual appeal
- Clear and simple label declarations
- Ingredients traceable back to the original source
- Vertically integrated supply chain
- Sustainable production methods
- Plant-based
- Halal
- Kosher

About EXBERRY® Coloring Foods

Our range of EXBERRY® Coloring Foods comprises hundreds of shades from across the whole rainbow. They are available in various formats to suit individual project requirements, including liquids, powders, and organic.

Industry-leading traceability

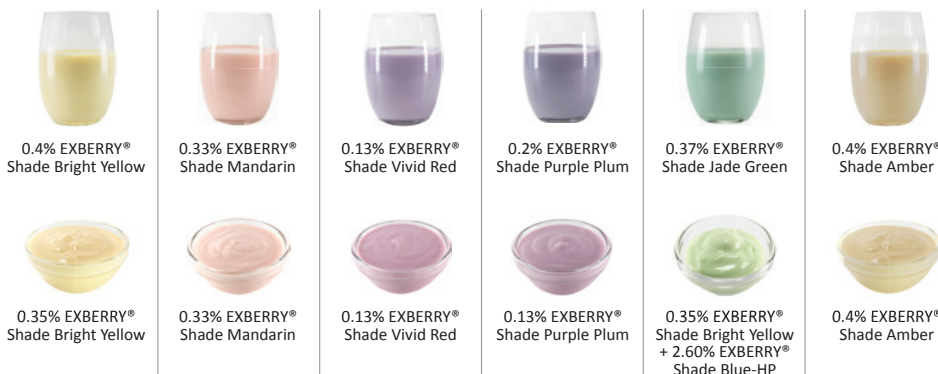

GNT's supply chain is vertically integrated, which means we have complete oversight of the fruits, vegetables, and plants we used to make our Coloring Foods. Our expert agronomists monitor cultivation and harvesting every step of the way to guarantee availability and ensure that only high-quality raw materials are used.

EXBERRY® Coloring Foods are available in following formats:

- Liquids
- Powders
- Organic
